Elevated Perimeter Light Model 1602

Applications

Our Model 1602 Elevated Perimeter Light can be used as a perimeter light to outline the helipad touchdown and lift-off area (TLOF) of elevated helidecks or existing pavements heliports on the FATO perimeter (depending on the recommendations and standards of the applicable regulating agencies).

Specifications

- Perimeter lighting that exceeds FAA and ICAO recommendations.
- Low profile perimeter light designed to last at least 50,000 hours, which substantially reduces maintenance costs.
- Only 7WHr consumption.
- Wide input voltage: 90 to 300 VAC, 50-60Hz.
- Height: 3.5"
- Weight: 5.5 lb.
- Model #DHS-1602-LG-000
