

Q-Aircraft Warning Light Controller

Applications

Our custom made aircraft warning light controller can come in many different variants.

Technical Specifications

- Product Code: Q87WM0x
- Classification: Safe Area
- IP-Index: IP66
- Enclosure: Steel with powdercoat.
- Mounting: Wall mount
- Input Voltage: 100-240 Vac
- Cable: H07RN-F 3x1
- Output Voltage: As per type of light

Enclosure Specifications

According to the installation environment, control board electrical circuits are enclosed in specific housing box:

- Usage: indoor or outdoor
- Material: grp, painted steel, stainless steel
- Protection: from IP55 to IP66
- Flash: Synced via GPS in light or via controller

Control Board Functions

- Photoelectric Switch: As per option
- Fault Management: Automatic by switchover
- Alarm Management: Remote transmission of alarms, generation of visual alarms
