

HELIPORT LIGHTING SOLUTIONS BUILT FOR REAL-WORLD CONSTRUCTION

Rugged, Compliant, Contractor-Friendly Systems

About Flight Light

- Founded in 1993
- Manufacturer and global distributor of airfield, helipad and obstruction lighting products
- Commercial, private, and military customers worldwide

Complete Heliport Lighting Systems

- Perimeter lights (inset, elevated, surface mount)
- Floodlights
- Rotating beacons
- Wind cones
- System controllers

HL-690L LED Semi-Flush Perimeter Inset Light

- Semi-flush, low-profile design
- Heavy-duty stainless steel construction
- Designed for concrete helpads and high-traffic areas
- Long-life LED reduces maintenance
- [More information](#)

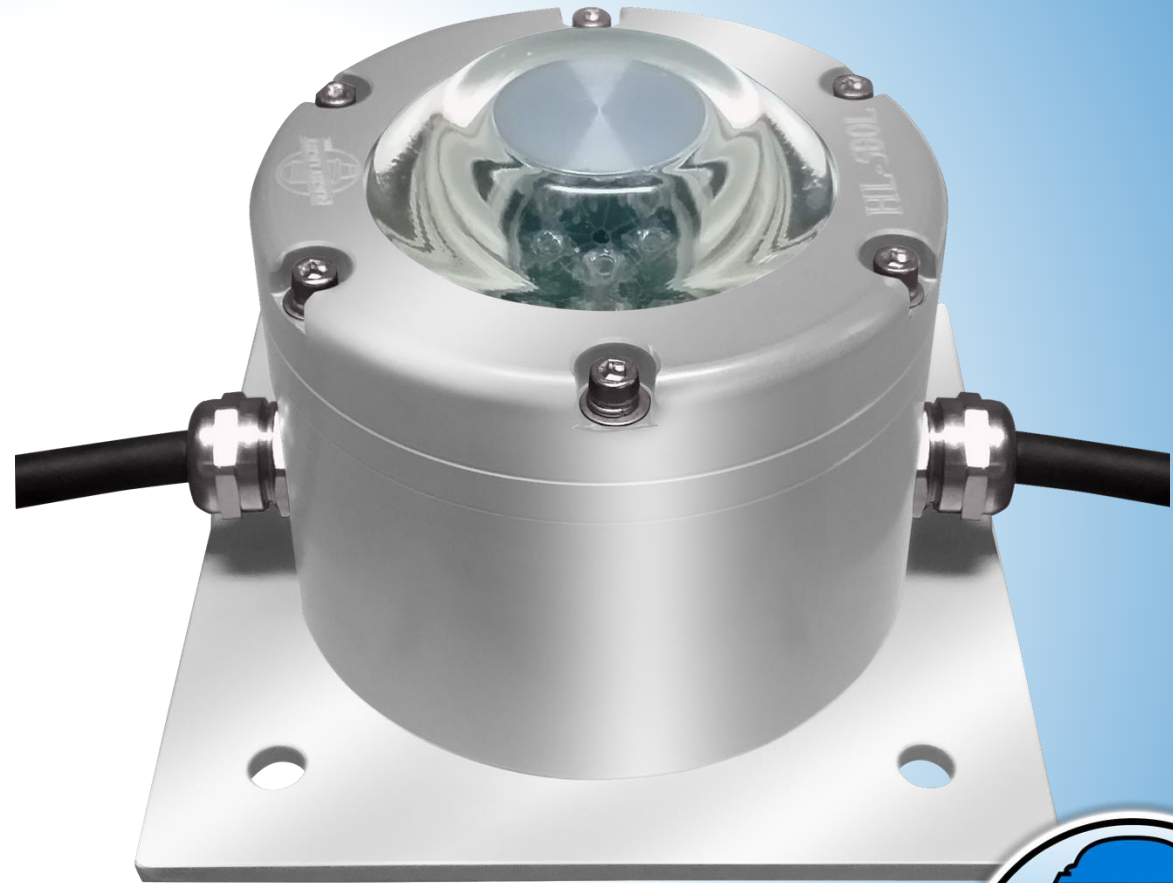

HL-860L LED Heliport Perimeter Light

- Elevated perimeter lighting solution
- High visibility with low power consumption
- Durable outdoor-rated housing
- Best for ground-level heliports and retrofit projects
- [More information](#)

HL-580L Stainless Steel Surface Mount Perimeter Light

- Surface mount design with no core drilling required
- Water-resistant construction
- Stainless steel housing
- Energy-efficient LED technology
- [More information](#)

L-801 HL LED Heliport Rotating Beacon

- Medium-intensity heliport identification beacon
- LED reliability and long service life
- Improves approach recognition and heliport visibility
- [More information](#)

HL-FLED Heliport LED Floodlight

- Uniform illumination across the landing area
- Energy-efficient LED output
- Rugged outdoor-rated design
- [More information](#)

Heliport Lighting System Controller

- Centralized control of heliport lighting components
- Supports perimeter lights, beacons, floodlights, and wind cones
- Designed for reliable operation and easy commissioning
- [More information](#)

WC Series Wind Cone (AC or Solar)

- FAA L-806 style design
- Frangible construction
- Available in AC-powered or solar configurations
- [More information](#)

L-810 LED NV Red Obstruction Light

- Omni-directional, steady-burning red LED obstruction light
- Night Vision Goggle (NVG) compatible — enhances pilot visibility
- Direct replacement for incandescent fixtures, long life, low maintenance
- ETL Certified & IP67 weather and corrosion resistant for outdoor use
- [More information](#)

Proven in Real-World Installations

- Hospital and medical helipads
- Rooftop and elevated installations
- Offshore platforms and vessels
- Remote and unmanned sites
- Coastal and harsh environments

A Reliable Partner for Heliport Construction

- Contractor-friendly product designs
- Responsive technical support
- Proven performance in demanding environments
- Long-term product availability
